

### FEATURES

### DESCRIPTION

The models of the PASTRY line capture attention for their cutting-edge design and the smart functions of the 5" TFT touchscreen, which transform the concept of vacuum packaging machine into a "Food processor": the "chef" and degassing cycles allow for multiple food preparations and treatments, making it a versatile and multipurpose work tool, suitable for the gourmet restaurant sector;

- Oil lubricated rotary vane vacuum pump Busch, nominal speed 100 m³/h;
- Vacuum level control through a high precision absolute type sensor, which does not require calibration;
- Maximum achievable vacuum 99.8% (2 millibar);
- 988mm double sealing bar, triple function single seal, double seal, seal-cutting. Easily removable for cleaning;
- AISI304 horizontal tank;
- Removable inert gas inlet bar with 6 nozzles and 'Gasplus' system for up to 90% inert gas for extremely crush-sensitive products and 'Softair' slow air re-entry as standard;
- Control panel with 5" TFT touch screen, protected by scratch-resistant tempered glass, resistant to liquids, humidity, dirt, and dust;
- 6 languages available (IT, EN, FR, ES, DE, RU);
- 8 user-editable cycles with customizable names;
- 16 pre-set "Chef Pastry" cycles for food process and packaging, some of them benefit "repeatability" function (soft cakes, pastry creams, pasteurized base water-based, pasteurized base milk-based, whipped creams, panettone, biscuits/short pastry, pralines, yeast cakes, infusions, tramezzini/sandwiches, piping bags creams, pizza/focaccia, bread/loaves, powders/spices, custard, 3 pre-set cycles with inert gas injection, 3 pre-set cycles with inert gas injection, 3 pre-set cycles for vacuum containers, 2 generic pre-set cycles for preservation and sous-vide cooking; 5 editable and nameable automatic degassing cycles over 10 phases with gas injection possibility;
- Cycle search system according to criteria: Recent, Top ten, and Favorites (up to 12 cycles assignable to this category);
- Oil pump dehumidification cycle "H2Out", with automatic alerts for: product cooling necessity, "H2OUT" cycle execution, or oil change need;
- Menu accessible to technical support for parameter adjustment and reading of the history of cycles and maintenance performed;
- Wi-Fi module for connection to the Orved cloud;
- PMMA lid in bluish high thickness, with rounded edges. Automatic opening at the end of the cycle;
- Lid lowering system in rest position through side lid lock;
- Detachable counter bar;
- Fan system for heat extraction;
- Easy maintenance access through the front opening of the casing;
- PE shelves for product placement and cycle speed-up.
